

## Model Series: YG-238

### Welding Chipping Hammer 300 g

Spring-handle chipping hammer with cone and chisel ends for removing slag and spatter after SMAW/flux-core welding. Shock-absorbing coil handle with hanging loop.

Part.No	Head weight	Overall length	Ends	Handle	Material	Finish
YG-238	300 g	~280–300 mm	Cone point + flat chisel	Steel coil spring with loop	Drop-forged high-carbon steel head and shaft	Black oxide/paint

### Features / Applications

- Dual-end head for tight spots (cone) and broad slag removal (chisel)
- Spring handle reduces vibration and dissipates heat
- Loop for easy hanging; durable forged construction

### Normes Applicables / Compliance

- Hand tool; use with safety glasses/face shield per EN 166
- Maintain sharp chisel edge; wire brush after chipping for clean welds
