

Model Series: YG-522 • YG-524 • YG-526 • YG-528

Product Type : TIG Collet Body

Copper collet bodies for TIG torches. Distributes shielding gas and clamps the tungsten via the collet. Sizes match tungsten diameters.

Part.No	Description	Tungsten Ø	Torch series	Material
YG-522	TIG Collet Body	1.6 mm	Fits common air-cooled torches (e.g., WP-17/18/26 family) and compatible models	High-conductivity copper, gas-distributing ports
YG-524		2.0 mm		
YG-526		2.4 mm		
YG-528		3.2 mm		

Features / Selection:

- Precision threads and ports for stable gas flow.
- Match collet body size to tungsten and collet size.
- Use with correct back cap and ceramic nozzle for best results.

Applications:

- GTAW/TIG welding on steels, stainless, aluminum
- Fabrication, maintenance, site work

Regulations / Applicable Standards:

- IEC/EN 60974-7 (torches and ancillary equipment—context)
- Verify torch model and tungsten size before selection
