

Model Series: YG-569

Product Type : WP26 Microswitch (Torch Trigger Switch)

Replacement trigger microswitch assembly for WP26 air-cooled TIG torches. Provides on/off control of gas and current via the torch handle button.

Specification	Value
Part.No	YG-569
Torch family	WP26 handle (also fits many WP17/18/26-style handles)
Type	Momentary microswitch with lever/button cap
Electrical	Low-voltage control circuit (use per machine wiring)
Leads/connector	To torch control harness; connector type varies by kit
Use	Service replacement for faulty/damaged torch switch

Features:

- Positive, light-touch actuation for precise starts/stops.
- Drop-in replacement for WP26 style handles.
- Durable housing with strain relief for leads.

Applications:

- GTAW/TIG torch trigger control replacement
- Workshop maintenance and service of TIG torches

Regulations / Applicable Standards:

- IEC/EN 60974-7 (torches and ancillary equipment—context)
- Disconnect power and gas before servicing; follow OEM wiring diagrams
