

## Model Series: YG-656

### Product Type : Gap Welding Gauge (Taper Gauge)

Stainless steel tapered feeler/gap gauge for quick measurement of root opening, fit-up gaps, and slot widths during fabrication and welding setup.

Specification	Value
Part.No	YG-656
Material	Stainless steel, etched graduations
Range / resolution	Tapered scale (typ.) 0–20 mm or 0–1 in with 0.1–0.2 mm (or 1/64 in) readability depending on model
Form factor	Slim tapered blade with hanging hole; pocket size
Use	Root gap measurement for butt joints; slot/clearance checks in fabrication; quick fit-up verification

#### Features:

- Fast, go/no-go gap checks with tapered blade.
- Etched dual-scale graduations for durability.
- Compact tool for fitters and inspectors.

#### Applications:

- Pipeline and structural steel fit-up
- WPS root opening verification

#### Regulations / Applicable Standards:

- Use per project codes (AWS D1.x, ASME B31.x, ISO) and WPS gap tolerances.
- Maintain tool accuracy per QA/QC procedures as required.
