

Model Series: YG-658

Product Type : Welding Gauge Kit

Complete set of stainless-steel welding gauges in a protective carry case for weld fit-up and inspection. Covers most common measurements required by typical welding codes.

Specification	Value
Part.No	YG-658
Material	Stainless steel gauges, etched/engraved graduations
Typical contents	Hi-Lo gauge, fillet weld gauges (inch/mm), undercut/penetration gauge, bridge cam gauge, gap/feeler gauges, ruler, taper gauges, pipe pit gauge; contents may vary by kit
Scale	Dual inch / metric
Case	Padded carry case with foam insert and latch
Use	Fit-up and weld inspection: fillet size, reinforcement height, undercut, misalignment (Hi-Lo), gap, and more

Features:

- Comprehensive set for shop and field QA/QC.
- Durable stainless construction; clear graduations.
- Organized, portable kit for faster inspections.

Applications:

- Piping, structural, pressure vessel, and fabrication work
- Verification against WPS and project tolerances

Regulations / Applicable Standards:

- Use per applicable codes and standards (e.g., AWS D1.x, ASME Section IX/B31.x) and project QA procedures.
- Inspection tools require periodic verification/calibration per QA plan.
